Diploma in Web Development  
2023 – 2024

## SKILLS

- 1. Proficient in frontend technologies: HTML, CSS, JavaScript.
- 2. Skilled in responsive design frameworks like Bootstrap.
- 3. Familiar in building interactive user interfaces with React.
- 4. Knowledgeable in TypeScript for scalable and robust applications.
- 5. Familiar with Tailwind CSS for efficient styling.

## CERTIFICATIONS

- 1. Certified in React.js for Beginners from simplilearn.
- 2. Certified in Frontend Development from Aptech Pakistan.

## PROJECT EXPERIENCE

### Luxeloom Website

Aptech | 2024

- Independently designed and developed Luxeloom, a modern React-based website showcasing women's clothing designs.
- Managed all aspects of the project, including UI/UX design, development, and creating banners using Canva.
- Implemented features such as routing, responsive design, and modern UI elements.
- Utilized technologies including React, React Router, CSS, and SwiperJS.

### Brainwave | UI-UX Landing Page

Aptech | 2024

- Developed a clone of a modern UI/UX website using React.js and Tailwind CSS, showcasing sleek design and seamless animations.
- Implemented modern UI/UX principles, setting a high standard for future applications.
- Utilized Vite for development and Tailwind CSS for intricate shapes and stylish gradients.
- Features include beautiful sections, parallax animations, complex UI geometry, incorporation of latest UI trends, and full responsiveness across all devices.

### Zara's Therapy Website

Aptech | 2023

- Developing a professional, visually appealing, and user-friendly website for Zara Therapy Clinic to showcase services and attract new clients.
- Utilizing technologies such as HTML, CSS, and JavaScript for structuring content, styling, and adding interactivity.
- Implementing features including therapy descriptions, therapist profiles, contact information, testimonials, and a responsive design for compatibility across all devices.
